The conference is recommended

for theoreticians and practitioners dealing with designing,
construction and exploitation of hydraulic structures.

The official languages of the conference are **English and Polish**.

The conference will be held in the Żywiec Beskids in Poland.

Participants have the opportunity to take part in technical tour
to Świnna Poręba reservoir.

CONFERENCE TOPICS

- I. Dam safety – formal and legal problems
 - Technical and construction regulation, standards, the best practices
 - Failures and dam breaks
 - Tailings ponds
- II. Exploitation, maintenance and repairs of hydraulic structures
- III. Technical condition and safety monitoring of dams
- IV. Internal erosion in earth structures
- V. Water-power engineering - energy potential of rivers and environmental implications
- VI. Dam reservoirs – sedimentation problems

A poster session is planned, focusing on new methodology usage
in hydraulic structures diagnostics topics.

Authors are requested to **submit their scientific papers**
to the Organizing Committee according to the above mentioned
topics area.

The scientific papers will be held for revision and qualification
for their publication in the **IMGW Monograph series** and
presentation during the conference.

The registration form and general guidelines for authors can be
downloaded at www.is.pw.edu.pl or www.ibs.pw.edu.pl or
www.imgw.pl.

The possibility of the **company's promotion** may be in the form
of presentation, exposition, advertisement or in conference
materials as a separate part.
